Two Books by Mark Monmonier

How to Lie With Maps (Second Edition)

This lively essay on the use and abuse of maps teaches how to evaluate maps critically and promotes a healthy skepticism about these easy-to-manipulate models of reality. It includes extensive discussion of deliberate oversimplification, poor reproduction, problems of computer-generated maps, advertising deceptions, misuse of maps in zoning disputes, misleading use of color, and use of maps as political propaganda. The second edition includes two new chapters, 10 color plates, and a new foreword by renowned geographer H. J. de Blij. *1996: University of Chicago Press (softcover), 221 pp.*

Member price: $13. Nonmember price: $15. **Please add 10% for postage and handling.** Ask for publication C171. Send your order to: Fulfillment Coordinator, ACSM, 5410 Grosvenor Lane, Suite 100, Bethesda, MD 20814-2122. Phone: 301/493-0200. Fax: 301/493-8245.

Drawing the Line: Tales of Cartocontroversy

Most people trust the maps they come across, setting aside the skepticism that they would otherwise bring to words or statistics. But maps as powerful instruments of propaganda have had a disturbing effect on our view of the world, our health, and the impact of our votes. In this thoroughly entertaining book, Monmonier explores a sampling of historical and contemporary, global and local, controversies. *1995: Henry Holt (softcover), 368 pp.*
